*Peaked at 148#s
*Owned by Lavern Martin, PA

Pine-Tree Dairy purchased ZADE because of our “breeder satisfaction” with his daughters. Of the thirteen that have completed records at our farm, they average +1,000 lbs milk over herdmates. They mature with adequate strength (26 on strength code), with tremendous udders, & they look the type to believe his high P.L. Pine-Tree Dairy has six Zade sons in AI, and two of his daughters have sons in AI.

ZADE’s pedigree is an outcross to O-Man, Shottle, Goldwyn, BW Marshal, Elton, etc. ZADE’s proof has been through two base changes. There are only three active bulls with over 95% Milk Reliability, +2.00 in Udder Composite, and over 420 NM\$: Goldwyn, Shottle, and ZADE.

Zade is over twelve-years old, in excellent health, and an excellent semen producer.
